

## Plantable Cards

Scribe and Grow started with fun and thoughtful greeting cards, cards you can plant after use...how cool is that!?

Based on the Isle of Skye all our cards are made with paper packed full of bee-friendly flower seeds and made from 100% pre-consumer recycled cotton.

Each card includes a kraft paper envelope. Card clasps keep the card and envelope together. Some customers prefer our biodegradable sleeves which protect the card and envelope completely. Both look great, - its your choice!

Each card is created, printed, and packaged by hand on the Isle of Skye.

All designs are licensed for commercial use.

## Grow Candles

Our Grow Candles are made using eco soy wax, in 20cl tins with lids.

Grow Candles are a zero-waste product, which enables the consumer to burn the scented candle and then plant the herb or flower-infused seed disc found inside. A quick wash and the tin becomes a plant pot!
